BSc (Hons) Global Degree in Project Controls*

*BSc (Hons) Global Degree is validated by the University of West London, United Kingdom

About us

London Metropolitan College is a specialist niche college established to develop a skillset in project management, project control and improving complex projects and programmes. We are focused on upskilling the global workforce in project management and project control, we do this by enabling organisations to achieve their business goals by educating their workforce.

We engage with employers and learners across numerous industry segments, particularly engineering and construction, where project controls are integral to delivery.

Our apprenticeship programme is well developed, with our recent Ofsted report showing significant progress and results being delivered for our employers.

LMC is a part of the Projcon Group. Projcon Group delivers training programs in Australia as a Project Controls Institute Australia

We are passionate about providing education and development programmes that build this capability, helping organisations see the return on investment and return on expectation.

Currently engaged with employers throughout the UK, our international development of LMC is positioned to progress rapidly in 2022. London Metropolitan College is made up of subject matter experts to give a true holistic approach to your needs and are a team who are passionate about changing people's lives and careers through education.

Our newest college facility in Wimbledon, south west London, will give learners access to face-to-face education whilst continuing their online studies and real-time work experience with their organisation.

It is possible to "earn while you learn" and continue to build a future proof, professional career. This provides tangible benefits for both employers and learners.

"Above all, we keep our learners at the heart of everything we do".

Apprenticeship Overview

OUR APPRENTICESHIPS

Delivery approach

At LMC, we have used our specialist skills in Project Controls and management to devise an advanced training schedule and delivery system designed to work around employers' requirements.

We set out to develop our students' competencies by giving them access to an online learning environment that encourages skill-building, information retention and transferable experience into the workplace.

Courses are also delivered in online classrooms, which include technical, occupational and software training.

Key Features

All of our apprenticeship programmes offer:

- A dedicated tutor to support students throughout the course
- Flexible and innovative training methods geared towards different learning styles
- Continuous access to learning via online learning platforms
- Tuition from highly experienced specialists
- An NUS Apprenticeship Extra card, for access to discounts and online offers

Apprenticeship Clients

LEVEL 3

PROJECT CONTROLS TECHNICIAN APPRENTICESHIP

Course information

This programme is designed to develop competent Project Controls Technicians. Students will learn how to control, monitor and systematically analyse progress and performance data for engineering, manufacturing, construction and infrastructure projects. Apprenticeship includes the ECITB Level 3 Diploma in Project Controls Practice.

Delivery approach

Virtual, including technical, occupational and software training

Standard Duration

Up to 24 Months (this does not include EPA period)

Start Date

February, June, October 2022

Location of study

Virtual/ employer's locations

Entry Requirements

A minimum of 5 A*-C GCSE qualifications including English and Maths, and 48 UCAS points or equivalent qualifications. However, different employers have different standards and requirements. We work hard to ensure the best fit between the employer and the candidate.

LEVEL 4

HIGHER APPRENTICESHIP INFORMATION MANAGER

Course information

This programme is designed to develop competent Information Managers who can support the delivery and management of critical information in the capital delivery phase of an infrastructure project.

Students will work with a range of stakeholders to manage information and data as it moves through its lifecycle.

Delivery approach

Virtual and classroom (2 days per month)

Duration

Up to 24 Months (Excluding EPA)

Start Date

February, June, October 2022

Location of study

LMC London (Wimbledon)/ employer's locations

Entry Requirements

A minimum of 5 A*–C GCSE qualifications including English, Maths, and 48 UCAS points or equivalent qualifications.

LEVEL 3

BUSINESS ADMINISTRATOR WITH ENHANCED PROJECT FUNDAMENTALS APPRENTICESHIP

Course information

This programme combines the popular Business Administration L3 Apprenticeship with Project Management Fundamentals (APM PFQ). Students will learn how to embed the principals of project management within their administrative role to drive performance and deliver successful outcomes for their organisation.

Delivery approach

Virtual. Includes both apprenticeship and APM Qualification

Standard Duration

Up to 18 months (this does not include EPA period)

Start Date

Flexible

Location of study

Virtual/employer's location

Entry Requirements

Must be working in an administrative role, typically apprentices will be in roles such as Administrator, Document Controller, or other Project Support role.

LEVEL 4

ASSOCIATE PROJECT MANAGER APPRENTICESHIP

Course information

This programme is designed to develop competent Associate Project Managers. Students will learn how to recognise the requirements of each project and how to bring it to fruition. Working closely with their team, they will learn how to employ planning, organisation, leadership and communication skills to streamline a project's progress.

Delivery approach

Virtual, including technical, occupational and software training

Standard Duration

Up to 24 Months
(this does not include EPA period)
