Advance Diploma in Project Controls

Accreditations

About us

Project Controls Institute

Project Controls Institute was established in September 2010 and is part of the Projcon Group- leading Project Controls service provider.

As the world's leading learning institution for project management and project controls, we are becoming a global leader in project management and project controls

Why us?

With decades of experience, we launched PCI – a unique, fast-track learning portal to equip individuals and organizations with the tools they need to succeed in Project Controls and Project Management.

Over the years, we have helped governmental, and a range of regulatory bodies draft national standards and certifications that stand for excellence worldwide.

We ensure you receive the best education possible, whether you are enrolled in classroom-based courses or taking online courses.

Our vision

In a fast-paced world where the industries have always struggled to validate opportunities for long-term, senior career growth and transferable expertise across countries.

Our courses are designed to empower a global workforce of project controls to fill in these gaps.

What we offer

Our modules cover a wide range of project controls, reflecting processes used throughout Europe, US, Africa, Middle East and Southwest Asia.

- Learn Project Controls skills quickly and efficiently, wherever you are in the world.
- Develop practical "real world" knowledge of software and operations alongside the theory.
- Achieve accreditation that is relevant to every industry and location.
- Share knowledge and expertise on Project Controls across organizations, countries, and cultures.

About Course

Advance Diploma in Project Controls

The Advanced Diploma in Project Controls is designed to propel experienced project controls professionals to the forefront of the field and, equip them with advanced techniques and leadership capabilities. This comprehensive program is meticulously crafted for those seeking to elevate their expertise and impact within complex project environments.

Through a rigorous curriculum, participants refine their abilities to monitor project progress, implement robust controls, and generate insightful reports that guide informed decision-making. Advanced proficiency in risk management is fostered, empowering graduates to identify, assess, mitigate, and respond to project risks with greater effectiveness.

Furthermore, the program cultivates a strong commercial awareness and equips participants with the skills to effectively manage project contracts, ensuring optimal project outcomes. In-depth exploration of supply chain and procurement processes leads to expertise in securing resources efficiently and ensuring project continuity. Additionally, participants gain a deeper understanding of governance and PMO (Project Management Office) environments, enabling them to contribute to a transparent and high-performing project ecosystem. Learning is solidified through applying advanced skills to a second work-based project, fostering leadership capabilities and demonstrating expertise to potential employers.

Upon successful completion, this ETA-validated program awards participants a UK government-validated certificate with 120 credits, a valuable asset recognised worldwide and a testament to their project control expertise.

FAQ

1. How is the course delivered?

Guided learning hours for the course are 200. The course is flexible, you can work according to your own schedule. The course is assignment-based. Each unit has two assignments, which need to be submitted and will be marked by the course tutor. The feedback for the submitted assignments will be provided by tutor within 15 working days of the assignment being submitted. On the successful completion of the unit, you will move on to the next unit and this way you will complete your course. There will be no formal exam for this course apart from the assignment submission. The certificate will be provided at the end of the course upon the successful submission of all your assignments.

2. How will you study?

When you enroll on the course you will be provided a Moodle link for studies where all the study material and session recording will be available.

3. What is so special about this course?

This is a unique course validated by UK government body (ETA) which is approved by UK government and the certificate will be accepted worldwide.

4. What support do students get?

All the learning material will be provided and uploaded to Moodle online learning platform. Additionally, 1-1 support sessions will be provided by the experts.

5. Tutor Support

Tutor support will be provided for the assignment submission.

6. Who is the course for?

Anyone who wants to get a better understanding in Project Management.

7. How do I watch the videos?

Once you enroll on this course, you will be provided access to Moodle Learning Platform where the session recording and study material will be available.

FAQ

8. Is the course self- paced?

You can access each lesson when you are ready. To move on to the next unit lesson, you must finish learning with previous unit. It is advisable to finish this course within 9-12 months.

9. Is the course accredited?

Yes, this course has been carefully designed by Projcon Group and validated by ETA (ETA is UK Government approved awarding body). After completing this qualification, learners will achieve 120 credits and a UK government-validated certificate. This certificate will be accepted worldwide.

The course can be taken from anywhere around the world. As long as you are able to study the course that is written in and delivered via English medium, it does not matter where you live. Further, the course does not include any activities requiring all the students to log in and interact in real time so time zone differences do not matter.

10. How much does it cost?

The overall course fee for this course is \$995.

11. Can I pay my fees in instalments?

No, monthly instalments are not accepted.

12. Payment Methods

You can pay your fee by selecting the following payment methods:

- Credit/ Debit Cards
- Paypal

13. What technical skills do online learners need?

Online learning platforms are typically designed to be as user-friendly. However, students still need basic computer skills to access and navigate these programs. These skills include using a keyboard and a mouse; running computer programs; using the Internet; sending and receiving email; using word processing programs; and using forums and other collaborative tools.
